

## *Rising 1st - 4th Graders*

### *Summer Math 2022*

In order to ensure a successful start in the next grade, it is very beneficial for students to continue reviewing math concepts and skills over the summer. Your child has been provided a Happy Numbers account to allow for this purpose. Happy Numbers gives students math practice that is personalized to his or her level of learning and mastery.

Please have your child continue his or her use of [Happy Numbers](#) throughout the summer. It is best to plan for three to four 15 to 20-minute sessions per week. **Please note: this site will be available *only until* August 1, 2022, as the company completes site maintenance and onboarding for the next school year during the month of August.**

If you are a new student and need a username and password or have any questions or concerns regarding your username and password, please contact Mrs. Sue McKenna at [smckenna@iccatholicschool.org](mailto:smckenna@iccatholicschool.org).
